6" Standard Extruded VAI-6S-E

8" Premium Extruded Custom Curve VAI-8PC

Just as many of the "old town squares" had storefronts draped with overhead supported canopies, the retail centers and walk-in businesses of today capitalize on this timeless tradition.

Unightly support systems have been replaced by powder coated specialty metals that match the color scheme of the fascia and decking. Heavy extruded aluminum components with baked on factory finishes provide years of uninterrupted service while maintaining an appearance that keeps the entrances fresh and inviting.
